Test-Drive Score Card

Take this score card with you when you give your prospective purchases a road test.

Rate each item from 1 (worst) to 5 (best). Consider every item individually and have a companion write down each rating separately as you drive.

If you are alone, pull over and park often to record your impressions. Don't wait until the end of the drive to jot them all down or you'll risk confusion.

This checklist should help you make an informed decision.
